BUYER'S GUIDE INDIA 2015-16

playtime[®]

India's Largest Play Environment Company

The Best Way To
Predict The Future Is
To Create It

- Abraham Lincoln

INC INDIA MAGAZINE HAS
RECOGNISED US AS ONE OF THE
**100 MOST
INNOVATIVE**
MID-SIZED COMPANIES
IN THE AREA OF PRODUCT

On behalf of our employees and channel partners, we accept this recognition with humility and dedicate it to our customers and the children who use our products.

Without their support and scrutiny, we would be just another company.

Playing for Children in more ways than one

Lakhs of children and their friends visit our water park on the outskirts of Mumbai.

We are amongst the Top 5 in the world in designing, making and installing rides and other equipment in water parks.

We are the single largest playground equipment and accessories company in India, bar none.

We have been in the business of delivering happiness, fun, and challenges to children and their parents for nearly forty years, serving tens of thousands of customers in over forty countries worldwide.

But Our Business Is Not Really About Us.

It's about each child that visits our water park, or plays on our slides and slides and other equipment, or lands on our surfacing solutions. And it's about our customers – educators, builders, landscape architects, municipality officials, resort owners- who are passionate about children, their friends and their families.

Like parents we use our intuition to look at how children would play, at what time and with whom. Like scientists, we use intelligence to research our customers, make our designs, choose material and manufacture our equipment.

Both ways, we are fussy, very fussy. It is as if we are building a space ship. It works.

Delivering Smiles through Sense and Science.

playtime®

PLAY SYSTEMS

Playtime aims to lead the global market with highly innovative products and services and it has now evolved into a leading play environment company with more than 300 innovative products.

VISION

To be a Globally Admired Leader in Industry by:

- Being Principle Driven
- Being an Inspired Team
- Being a Great Place to work
- Being Innovative & Trendsetting
- Being a 'Clients Delight'

And enlarge the values of all our Stakeholders

We Are Making Future Our Everyday Business

We all are living in interesting times.

Nothing excites us as much as our Future. Increasingly, nothing worries us as much as well.

As a pioneer and leader in the play systems market, we have always stayed focused on the Future – introducing solutions such as safety surfacing, multi activity play systems and outdoor fitness range, all of which has redefined parts of the market and offered our clients something beyond the ordinary.

Now, we are formalising our own learning process through professional Customer Research – enhancing our interaction with clients, parents and children and receiving direct insights from them about what we need to do in Future.

This is helping us think more about children than about swings, slides and see-saws. We are remobilizing our resources and investing in exploring answers to the questions of tomorrow.

How will our indoor, outdoor and virtual worlds converge tomorrow to create interactive and immersive play environments?

How will rapid adoption of Howard Gardner's Multiple Intelligences Theory change our education system and create healthier learning outcomes for our children?

How will Technology enhance our children's ability to absorb, assimilate and create, even while delivering fun, challenge and collaboration?

How will our living spaces and learning spaces work in tandem to combine physical fitness, mental agility and social responsibility and build citizens and leaders of tomorrow?

How will new materials and new production methods help us reduce the negative impact of human activity on environment and help us improve sustainability?

Over forty years, our products been tried, tested and trusted by thousands of discerning clients around the world. From each of those clients and our interactions with them, we have tried learning something new.

Today, we thank those clients and recommit ourselves to building the Future of Play Environment.

For Us, Tomorrow Has Just Started

Arihant Industrial Corporation Ltd. was founded in 1985 with focused manufacturing of various Sports Goods. Our products are designed for mental and physical development along with competitive sports spirit for children by building team spirit and co-ordination techniques.

A Partnership For Success

That's what our clients often state about us. Providing superior service is something in our genes, but you don't just have to take our word for it. Here are few testimonials that represent thousands of happy customers across the globe.

Corporates |

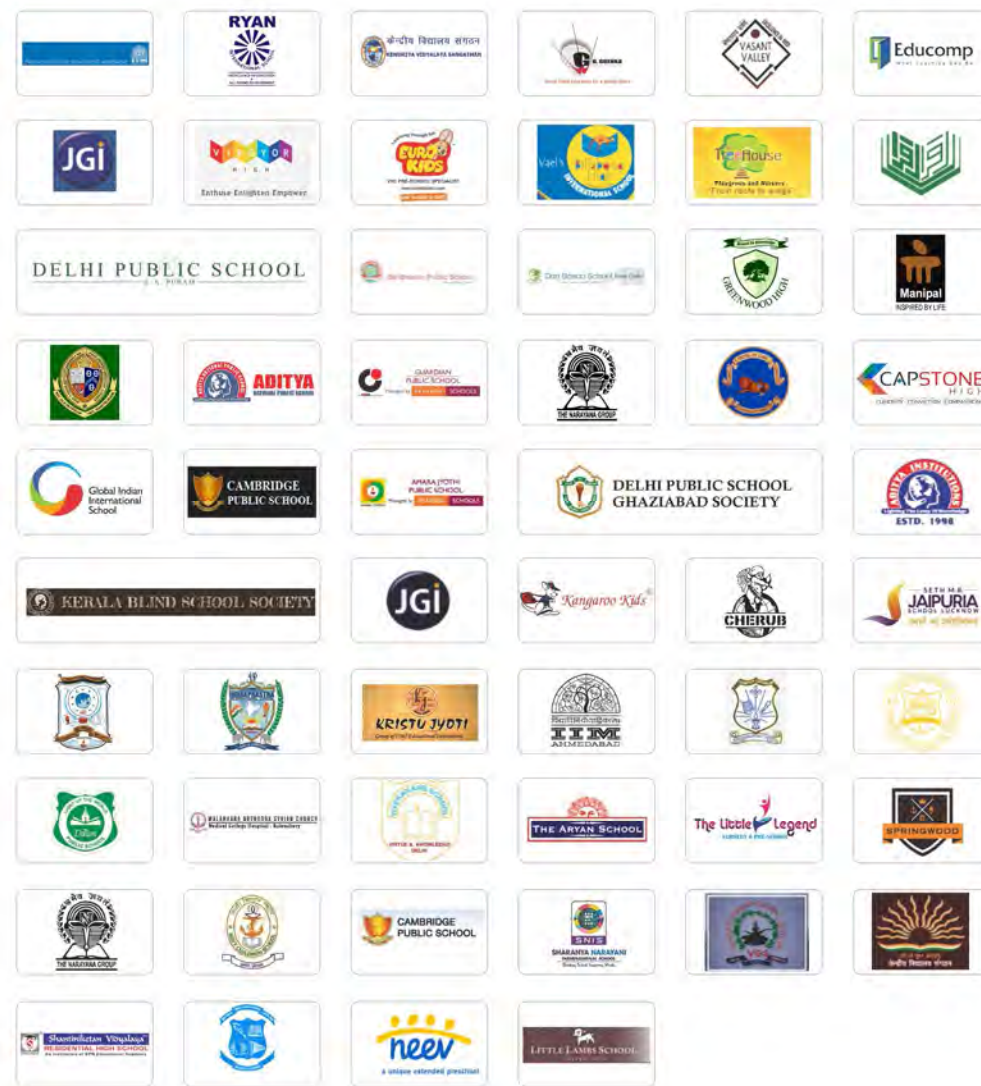

Playtime Arihant has ensured that the products that they develop are extremely safe for kids use without compromising on the aesthetics. Their product quality is excellent. The colors and characters that they have make the equipment very appealing and attractive to the children. They ensure that their products are delivered and installed well in time.

The strongest factor why we recommend this organization to people is their customer service. While their products are of an international class, it is the way they interact with their clients which distinguishes them. Their interaction is not limited to the sale. They stay in touch and keep updating you even after sales. I have no hesitation in recommending Playtime Arihant!

Educators |

66

Tree house education & accessories ltd has always believed in providing the best facilities for the children studying in our pre-schools. We are customers of playtime arihant since many years now and their products ensure that our children have a lot fun without compromising on the safety aspect. The creative design, attachments and bright colors are extremely popular with the children and help us in their overall development.

Arihant's sales staff takes care of our entire requirement and along with their vast experience recommends products to exactly suit our needs. We are extremely happy with the playground equipment and look forward to continued association.

Vishal Shah
Director
TREE HOUSE EDUCATION & ACCESSORIES LTD.

Developers |

The play system from Arihant is very child-friendly, durable and of a great quality. They are very attractive and safe for kids to use. Our projects have them since over 6 Years now and they still look and function as new brand new equipment. We are very satisfied with the product and the services rendered by Arihant even after the actual sale and often recommend it to others. Great Job! Keep it up.

Mayur Shah

Chief Sales-Business Unit
CKRUTI CITY LTD.

This is to certify that (Arihant) has always supplied good quality products to us. They have a wide range of products that are colourful, aesthetic, durable and appropriate for all our projects. We are very happy with their service even after of the actual sale. We really appreciate their service and support. Keep it up.

Kumar Shah

DGM Of Purchase
KANAKIA SPACES PVT.LTD.

We At Acme Housing India Pvt Ltd, have been using play equipments from Arihant since a long time. They have a wide range of safe and durable outdoor playground equipments for kids. Not only are their products colourful, but are also child friendly. We have always had a great support from Arihant in terms of regular updates about products, recommendation and guidance to help us choose the best products for each of our sites and even after sale services. We are extremely satisfied with their products and services. Infact Arihant has created a brand for itself in this Play Equipment industry.

Munish P. Doshi

Managing Director
ACME HOUSING INDIA PVT.LTD.

Clubs & Resorts |

We have purchased Play Equipments and Safety Rubber Surfaces from 'Arihant Industrial Corp. Ltd.'. Products are up to the standards and quality of the equipment also found to be good.

Understanding Children Is Crucial

And we are bettering it with each product

One of the most acclaimed theories is Howard Gardner's theory of Multiple Intelligences. The infographic on the adjacent page summarizes it. With reference to this theory, let's look into Play with relation to Multiple Intelligence.

Children need to play! It's as simple as it sounds. In recent time, academic pressure has put playing as the last option right after watching tv. Infact, lack of space, no adults around have further reduced children in the park and even replaced playgrounds and parks into shopping malls. But the so called silly childhood thing, is very important in your child's development. Play gives the child the opportunity to develop his own unique potential. How, you may ask? Let's take one or two factors of Multiple Intelligence – body kinesthetic and interpersonal. Say the child is climbing up the bars to the slide, or pushing himself off a swing or figuring the way out from a multi activity play system, he is using his own awareness of his body, how to move, how much can he climb, how much pressure to be put.. which involves body kinesthetic intelligence. Does he play with others, Ask help or help others, pushes others out or waits till others get their turn, all point to interpersonal intelligence. Play helps us adapt to ever changing environment and increases flexibility in the mind thereby also helping academic skills.

Play acts on multiple forces that is cognitive (which means intellectual activity like thinking, reasoning, decision making and so forth), emotional, social, adaptive and physical which comprises parts of intellectual abilities, which is emphasized in Gardner's theory. It helps resilience and confidence which is important in future. Being in the playground not just increases mental and physical well-being, but there is a simple joy in play. Something that is the most cherished part of our childhood stories."

Article by
Ms. Divya Nair - Acclaimed Clinical Psychologist

concept to COMPLETION

Arihant, we understand the vision of our clients. Owing to this ability, we have all the resources required to undertake complete projects from conception to completion. From start to finish we pay attention to the details that makes our product outstanding. There are times when great ideas must become a reality but knowing how to make that happen can be a real obstacle. We have a constantly applied quality assurance program that tracks every step of our development process. Pivotal stages in this process are:

advisory board of children

Children are our core strength and at a same time they are our weakness. Just like adults, they derive pleasure and discomfort from different objects, activities and sensations. Taking this further at anytime we have a routine survey with minimum 10 kids at a time about their choices and preferences. Where they talk about colours, shapes and play environment as well.

While asking questions, we structure our questions to encourage them to express their ideas, and to consider new ideas. We make sure every time that they enjoy this survey by planning blocks of sufficient time for forms of different creative exploration.

As one of the largest company that develops sports goods for children, it is vital that we give children a way to express their thoughts, then validate those thoughts, and act upon their interests while working on our product design and engineering. That's our way to say thank you to them.

Kids Are Our Greatest Gifts and should be treated with extraordinary care

Taking this further we have a Child Psychologist, a Landscape Architect, a Creative Teacher and an expert in the field of child growth and development are on board. Giving advises and suggestions on various factors while we implicate that in our designs ergonomically and make it more user friendly and challenging at a same time.

Hello, I am a **CANOPY**. I am the crown of our play structure sheltering kids from the exhausting heat. I am presented in 14 different styles and sizes.

Bonjour, I am a **THEME ELEMENT**, little kids can learn my names while playing and I make a play equipment more attractive. I am offered in 11 exciting varieties to choose from.

Hola ! I am a **Pole**. You could say that I am the backbone of the playstructure. Standing tall and strong, I make sure that the equipment is sturdy for you to play on.

Bonjour, I am a **SLIDE ENTRY**. To ensure that you safely sit down before you slide your way to glory.

High and high till we together touch the sky !
I am a **SWING** and at your service in 6 different types. And I also have a cute baby bucket seat version of me.

Namaste, this is **RAILING** - The original security officer. Protecting my kids and holding their hand. You can also learn from me. I am obtainable in 18 profiles.

Oye, what wants to come down, has to go up :)
I help you climb up to the land of fun. I am **LADDER**.

Hola, I am undoubtedly the most loved play structure by all kids. Yes you are right, **SLIDE**. I help you zoooooomm. You can happily chose among the 18 avataars that I come in :)

Hie, I am a **CLIMBER**. Designed specially to make you stronger, fitter and tougher. So hop on if you ready for the challenge

Safety Rubber
Surfacing ►

soft
safe
stylish

Research shows almost 60% of all kids' injuries are caused by falls to the ground. So should we stop our children from playing? Of course not... but using protective rubber surfacing under and around playground equipment can reduce the risk of serious injuries. Rubber Flooring offers impact cushioning that lowers the risk of injuries to children while playing.

It is attractive, anti-skid and is a safety net for children. It is the most beneficial in Play Areas for children, especially at the base of the Outdoor Play Equipment.

Being the experts in surfacing industry, we help you understand the basics of Rubber Surfaces.

A) What are the features and why prefer Arisafe?

Impact Cushioning, Customized Designs, Anti-Skid, Weather Proof, Low Maintenance are some of the key features of Arisafe. Arisafe surfaces help distinguish your project in every aspect right from conceptualization to completion of your project. We offer expert consultation on various aspects like design, raw material used or adhesive strength etc.

B) Where all I can install Arisafe Rubber Floorings?

Apart from Outdoor Play Areas, you can install it in Public and Society Gardens, Jogging Tracks, Basketball / Badminton / Volley Ball courts, Terraces, Podiums, Schools, Malls, Showrooms, Clubs, Resorts, Hospitals, Kindergartens, Day Care Centers etc.

C) What are the types of flooring and thickness?

Arisafe Safety Rubber Surfacing is available in 2 variants:

Arisafe EPDM flooring: is the best quality flooring. It involves granules that are self-pigmented in nature. This makes it last longer than the SBR variant. And they come in brighter colour shades.

Arisafe SBR flooring: is the next best option after EPDM. Its granules are pre-coated with colour and hence the shades available are slightly darker.

Thickness: The recommended thickness for rubber surfacing in Play Areas is 36 mm. This ensures required safety for a clear fall height of about 6-9 feet which includes 30 mm black rubber crumbs + 6 mm of EPDM/ SBR.

However depending upon where it is to be installed, we provide thickness ranging from 18mm onwards.

D) What is the Installation Process and time required?

1. Laying Base Layer (1-2 days)
2. Isolated Drying Time (1-2 days)
3. Theme and Design Customization (1-2 days)
4. Laying Background Layer (1-2 days)
5. Isolated Drying time (1 - 2 days)

*The actual time required depends on the location and size of the site.

Q&A

Straight Questions. Simple Answers.

How safe are your products?

We have always considered 'safety' in our products as the single most important factor. To make sure that the product we provide adhere to the highest safety levels, we take it into consideration right from the stage where our product is conceived. A testimony to this is that our panel members represent the Bureau of Indian Standards to formulate safety standards in India for the industry.

Do you have any representatives?

We have one of the widest distribution networks in the industry, both domestic and global. We have over 170 Channel Partners and Business Associates who represent us to our clients.

What material is used to manufacture the products?

We choose materials that are safe, durable and of a reputed make from reputed and reliable suppliers. We also take raw material quality test certificate from our suppliers. All our products pass through a formal Quality Control department to ensure consistent quality levels. Our play systems consist of three base materials Galvanized steel pipes conforming to IS : 1161 and IS : 1239 (part 10) standards
FRP - Fibre glass Reinforced Plastics made up of top quality polyester resin and virgin quality standard glass.
Rotational moulded plastic made up non-ageing, food grade and non-toxic materials with UV stabilizers.

What is general delivery time and mode?

The delivery time would vary from product to product. Generally all orders are ready for dispatch within twenty one working days from receipt of advance. The mode of transport is selected depending on our client's location and advice. We generally use roadways for domestic deliveries and waterways for international deliveries.

What is the average life of your product?

We ensure our product durability by using best quality materials and superior manufacturing. With proper maintenance our play systems can be used for as long as eight to twelve years.

Can your products be customized?

We offer a perfect blend of technical expertise, precision in manufacturing and high levels of Innovation. We have a dedicated design team that develops innovative designs using 3d programs. Owing to this most of our multi play systems can be customized for you according to your preferences, requirements and constraints. Do write to us, Our Play Consultants would be happy to assist you in designing your Dream Play Structure.

Do the products fade in colour?

Outdoor playground equipment are constantly exposed to harsh sunlight, rain, dust etc. that may result in colour fading. Knowing this, we use a mixture of special chemicals that reduce the fading time once the maintenance is provided.

Do the products rust?

Our products are manufactured using only Galvanized steel pipes. This ensures that chances of rusting are minimal. Since we understand your needs, the major raw material that we use is plastics that are rust free inherently. In addition to that, proper and timely maintenance makes sure that the products stay in best play conditions.

Bringing colours into your life is our promise

When it comes to colour, we are always excited. We humans, especially children are exceptional visually receptive beings. They make sense of our surrounding environments through the things they experience and feel with the different shades of colours they perceive. Many of our decisions and swaying moods are based on colours and lights we see. Harnessing this has become vital in order to draw kid's attention and keep them engage. So we are extremely careful while choosing colour schemes for our products.

Arihant has possible quality range of colours in all materials we use. Be it plastic, metal or FRP, we give our best to make product stand out and aesthetical soothing to eyes via colours.

7 things to watch out while your kid is playing

- Ms. Divya Nair

Play is an essential part in development of a child be it physical, emotional, social or intellectual. Whether the child is playing in a playground, on the X-box, iPad or inside the house with his or her toys, it tells us a great deal about them, if we only pay attention to it. So what are we looking at? And what should you generally look for?

1 WHERE:

Where does your child prefer to play? Does he or she like to be in the house with a selected bunch of toys, would he rather have just one best friend to play in the building, is he friends with the world and run about with everyone and everywhere on the playground? Preferences gives us insights how comfortable the child is in different places.

2 WHAT:

What does your child like to play? Is he the kind who loves only video games? Would she shun other kids and play with dolls in a corner or play teacher-teacher? Is it your child who is monkeying around, disregarding rules of games and generally having fun disrupting others' games? Understanding this will help you comprehend a lot of intellectual skills from creativity to simple problem solving.

3 HOW:

How is the child playing... quietly or with lot of ruckus? Does he give instructions to others, follow instructions or get angry when others don't listen to him? Does he throw the blocks, bang the blocks on the ground or build a tower of the blocks? Can he/she use it imaginatively or does he need to be shown what it is to be down? When you start noting how your child is interacting just with the toys, in the playground it's a wonderful insight on how he utilizes his skills.

4 WHOM:

Which age group is the child more comfortable with? Younger/ older/ adults or old people? If your child generally enjoys playing outside... which group of people is he/she interacting with? Keeping an eye on playmates is important to safeguard the child against any danger.

5 SOCIAL:

Observe how comfortable your child is in a group setting. Does he/she get teased, bullied or he/she the one doing the teasing and bullying. Early childhood impressions of the self do tend to leave impressions and need to be addressed.

6 STAMINA:

Play improves the child's endurance and stamina. Lack of appropriate play affects the child's overall development. Does your child feel tired quicker than other children of his age, does he show disinterest in physical activities or does he play all day long and yet would not fall asleep at night?

7 COMMUNICATION:

How does your child talk to others in a group? Is he argumentative, bossy or submissive, does he cry easily? Is he able to make his friends understand his opinions? Language is very important part which also develops in play and understanding communication patterns of the child in play will help parents and teachers improve upon communication skills.

About The Expert:

Divya Nair
Clinical Psychologist
(email: nairdivya2186@gmail.com)

Ms. Divya Nair has done her Masters in Clinical Psychology from Mumbai University. She has undergone training for Neuropsychological Assessments from KEM Hospital and NIMHANS, Bangalore. She has also undertaken several courses in Personal Counselling and Art Therapy. Divya has been a part of the Learning Disability Clinic at Sion Hospital for 2 years. At present, she is affiliated to Surya Child Care.

Ms. Nair is proficient in assessment of client needs, abilities and behavior using methods including psychometric tests, interviews and direct observation. She deals with both adult and pediatric populations. She has been conducting seminars and lectures for parents and teachers, especially on psychological issues related to children.

Desirable outdoor for children

- Dr. Payal Ubale

Outdoor play is good for children and each type has its own advantages. Play is fun for himself. From an infant to a 6 year old to a teenager....its the best way of learning. As Dr. Ackerman says: "Play is our brain's favorite way of learning".

Play strongly impacts the physical and mental health of children. Life in an urban area is less accessible for children due to space and time constraints. Here are some ways children can enjoy and benefit most with few play equipments and less space.

One of the best play equipments that enhance the physical tone and equilibrium of a child. Available in different forms and varieties, any linear and rotatory equipment is therapeutic for all age groups. When used in the correct way, it is the easiest way to manage hyperactivity and aggression.

0:

One of your childhood and you would remember the sand hills and castles! Sand is iconic for tactile processing. It's a great medium to enhance fine coordination and motor functions.

ES:

"Can you reach the top of slide first?" ; "Can you climb a slide from its slope rather than the steps?" " Mom, look here! We can both slide together!" Slides are amazing for kids. Working on their gross muscles and coordination, it can be used in a variety of games and enhances creativity.

SEE-SAW:

"See saw goes up, see saw goes down, its fun to be up and its fun to be down". This up and down movement is fun for kids. Not only improves physical endurance and balance, but also promotes social interaction and communication skills in children.

CLIMBING ROPES AND HANGING BARS

Found presently in different forms and complexities, building stamina and adventurous spirit!

MERRY GO ROUNDS:

One of the oldest outdoor play equipments among children. The recent modified versions are good and can be used for toddlers as well. It helps in building strength and muscle tone in children.

SWIMMING AND WATER POOLS:

Water is a great therapeutic medium for all children. Water and this makes swimming a highly beneficial outdoor play activity.

useful tips for a perfect playground

- Liza Thomas Menezes

be so much fun – literally! Global studies prove that children who have access to their childhood grow up to be more well-rounded individuals in their adult life, having don'ts of life at an early stage through fun and play. Social skills, confidence, self-h peer pressure, learning to share and care, a spirit of healthy competitiveness, fine ls, humour, dealing with failure, etc., can all be learned in the formative years of a child. ot need expensive equipment or a large space to be successful. What makes it effective safe place for all, promotes free play requiring minimal adult intervention and leads to useful tips to making a perfect playground are:

HERE:

ate the playground in a space that is easily accessible by children but away from icular traffic to avoid children running into it. Choose a place that receives good tilation and sunlight, both of which are essential to children.

AGE GROUP:

If space allows, group play equipment or areas into age appropriate zones to avoid larger kids monopolizing the playground.

SAFE DISTANCE:

Allow safe distance around each play equipment and do not crowd too many pieces of equipment into one area.

ACTIVITIES:

Provide for one or two larger multi play equipment for large group play and a couple of smaller equipment for individual play. Allow for equipment that provide a range of activities – swinging, climbing, sliding, crawling, balancing.

COLOURS:

Use play equipment that have bright attractive colours, that catch the sun and have no sharp metal edges.

SAFE SURFACES:

Play equipments need to be located in a bed of fine rubberized fall arrest safety surface. Safety surfaces can be in various colours or having graphics on them which appeal to children, like a giant snake and ladder board. Sand by itself forms a soft surface and a source of endless imaginative play for kids.

SUPERVISION:

The playgrounds should have high visibility for kids' safety. Avoid large shrubs or screening and instead use low ground cover around the playgrounds. Provide seating close by for adults to supervise children in playgrounds catering to smaller kids.
